# MITIGA

Are you ready for the new cloud security challenges?

Cloud adoption isn't slowing down, nor is the innovation that both drives and fuels the shift to cloud. Considering these cloud security challenges is an important step in making sure your organization is ready if — or when — an incident occurs in your cloud environment.

Cloud Adoption Trends

Worldwide end-user spending on public cloud services is forecast to grow 20.4% in 2022 to total $494.7 billion, up from $410.9 billion in 2021, according to the latest forecast from Gartner, Inc. In 2023, end-user spending is expected to reach nearly $600 billion.

Cloud solutions of all types – from global CSPs to SaaS start-ups – are on a cycle of constant change and innovation.

Cloud technology allows startups and midsize companies to access big tech capabilities — compute power, algorithms, programming tools, and architectures — and partner in an ecosystem with larger firms.

Mitiga's technology and services provide continuous, proactive breach investigation, lower the impact of cyber breaches, and optimize readiness for cloud and hybrid incidents. This readiness-first approach accelerates response and recovery time, increasing resilience when incidents occur. Mitiga's shared-responsibility model is unique. Unlike others, who charge additional fees for incident response and recovery, Mitiga subscribers face no add-on fees.
